MEETING TRANSCRIPTION

MEETING DETAILS

Date:	February 2, 2026
Classification:	Internal
Document ID:	TRANS-20260202-170253

EXECUTIVE SUMMARY

The meeting was held to discuss and evaluate the interface between Publican and Ghana Link. The main focus was to understand the data flow and ensure that both parties were receiving the data correctly. Ghana Link started the meeting by explaining the past issues they had with data transmission due to their old data center. They have since moved to a new data center and have been working with Publican to ensure the data is sent in real time. There were some minor issues with data structure and rounding up of data, but these were expected to be resolved within 30 minutes. The future plan is to integrate the data into the clearance process or the logic flow of icons. Publican confirmed that they had received the connectivity module and had been working to enable data intake and output with Ghana Link. They had a few minor technical alignments to make, but expected to be able to view and analyze the shipments soon. The meeting concluded with a discussion on how the return data would be populated and distributed, and a decision was made to allow Ghana Link and Publican to have an internal meeting to finalize the details.

KEY DECISIONS

- The decision to move Ghana Link to a new data center to improve data transmission.
- The decision to work on minor issues with data structure and rounding up of data.

- The decision to integrate the data into the clearance process or the logic flow of icons in the future.
- The decision to allow Ghana Link and Publican to have an internal meeting to finalize the details.

ACTION ITEMS

	Task Description	Responsible Person	Deadline	Priority	
	---	---	---	---	
	Resolve issues with data structure and rounding up of data	Ghana Link	Within 30 minutes of the meeting	High	
	Enable data intake and output with Ghana Link	Publican	ASAP	High	
	Finalize details in internal meeting	Ghana Link and Publican	ASAP	High	

NEXT STEPS

- - Ghana Link and Publican to resolve minor issues with data structure and rounding up of data.

- - Publican to enable data intake and output with Ghana Link.
- - Ghana Link and Publican to have an internal meeting to finalize the details.

CONCLUSION

The meeting was productive, with both Ghana Link and Publican sharing their progress and plans for the interface. The main issue discussed was the data flow and ensuring that both parties were receiving the data correctly. There were some minor issues with data structure and rounding up of data, but these were expected to be resolved quickly. The future plan is to integrate the data into the clearance process or the logic flow of icons, which will be discussed in further detail in an internal meeting between Ghana Link and Publican. The meeting concluded with a clear plan of action and a commitment from both parties to continue working together to ensure the successful implementation of the interface.
